

# The ISTI ADVANTAGE

## Seismic Monitoring Services

*Real-Time Decision Support  
Know as you go!*

**EXPERIENCE:** Major US Basins

**KNOWLEDGE:** Consulting Seismologists

**JUST RIGHT INSTRUMENTATION:** Geophone,  
Wideband, Broadband

**INFRASTRUCTURE:** Secure, Scalable  
Cloud Data Center

**24/7 OPERATIONS**

Instrumental Software Technologies, Inc.

# Real-Time Traffic Light System for Induced Seismicity Monitoring

*Custom Real-Time End-to-End Induced Seismic Monitoring Solutions*

## COUNT ON ISTI FOR:

### Operations Driven Service Levels

- Actionable information (Traffic Light System)
- Automatic alerting thresholds by magnitude, location and or depth
- Service level agreements tailored to operational requirements
- Event review by experienced analysts

### The ISTI ADVANTAGE System

- Real-time event detail available on your private ISTI ADVANTAGE web portal instance and by API for easy in-house GIS or Dashboard system integration
- Dashboards provide operational insights, updated in real-time
- Real-time catalog updates

### State-of-the-Art Processing Techniques

- Rapid determination of event parameters
- Processing system optimized and proven for detecting well scale induced seismicity
- Advanced processing techniques including double difference, template matching and machine learning

### Economical Hardware

- Seismometer performance optimization keep costs down
- Proven track record for reliability
- Expensive broadband sensors are not required

### Rapid Response Monitoring Crews

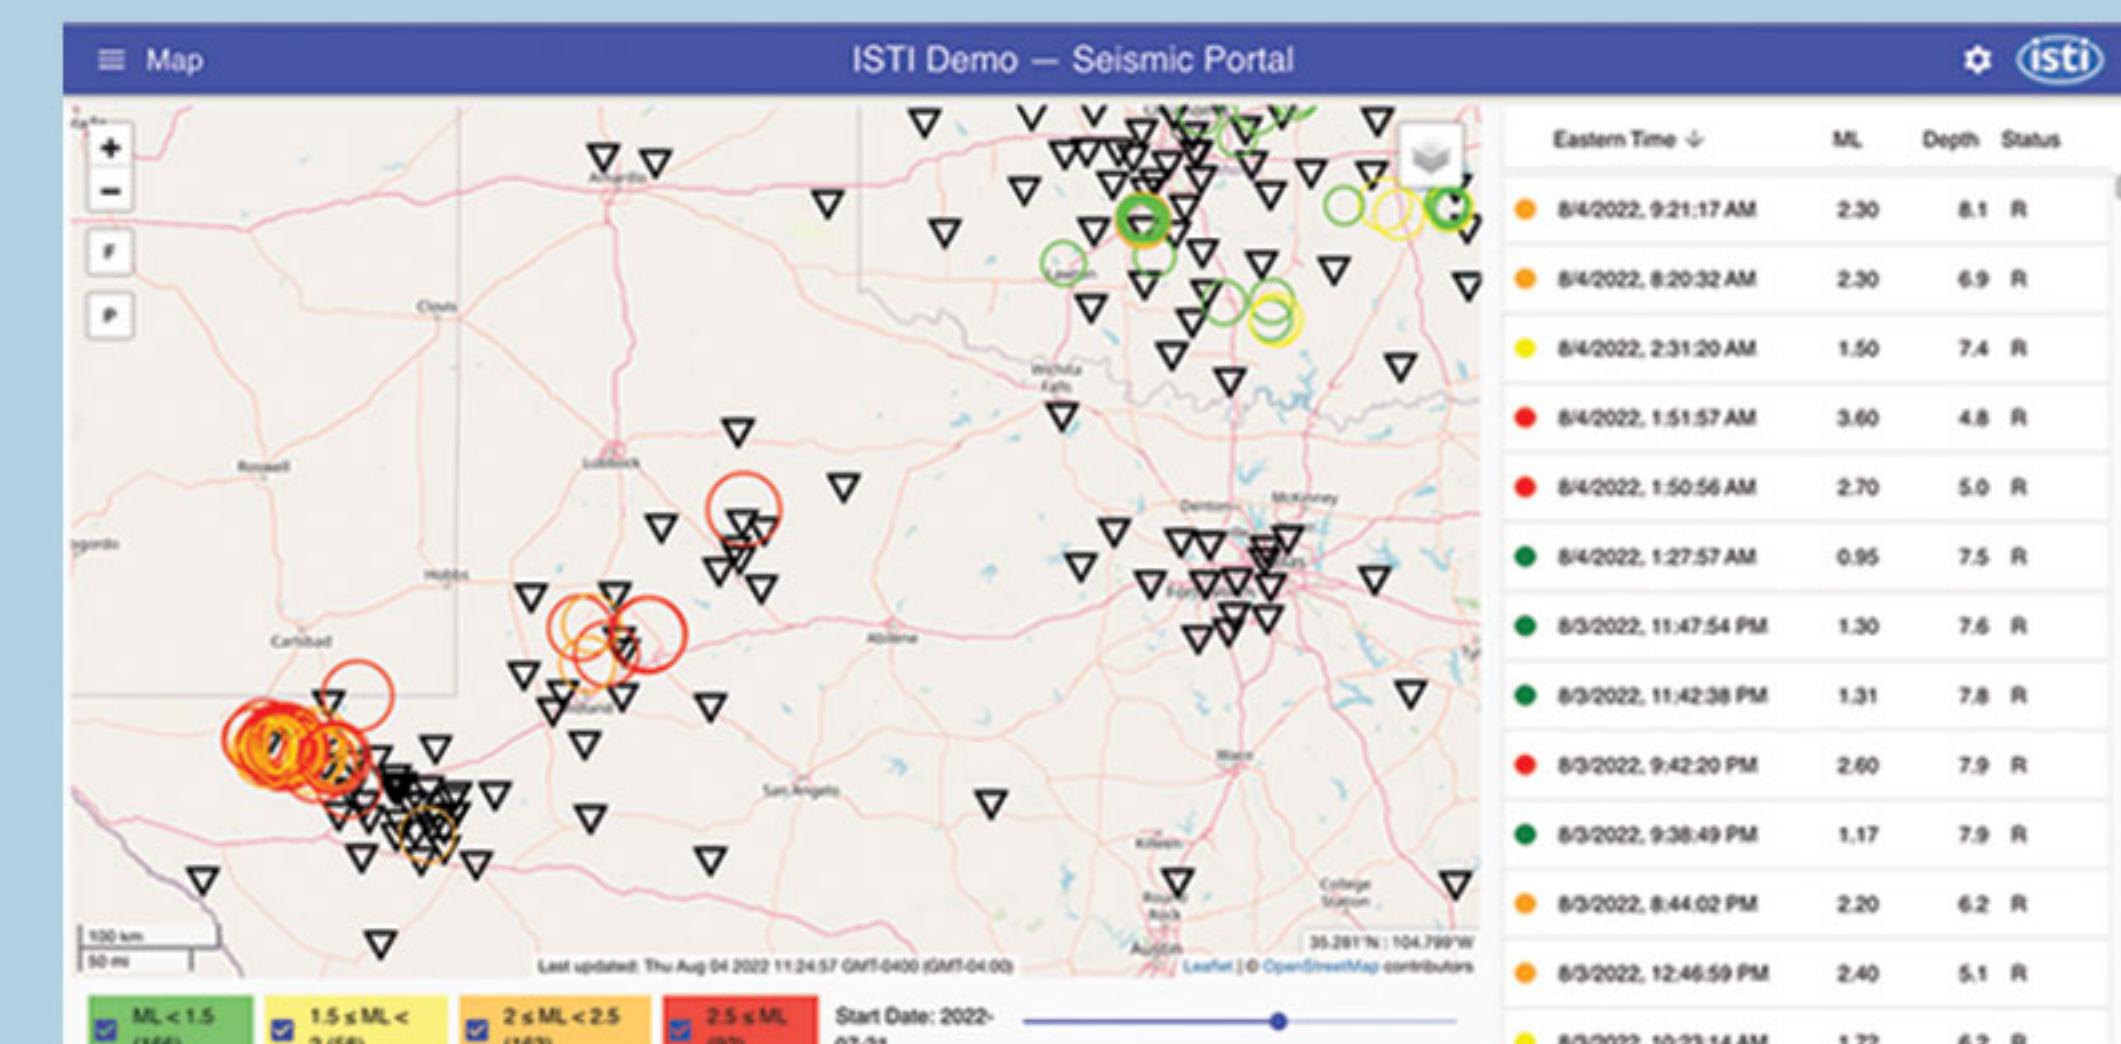

- Available in the United States and worldwide
- Ready to deploy on short notice

### Scientific Expertise

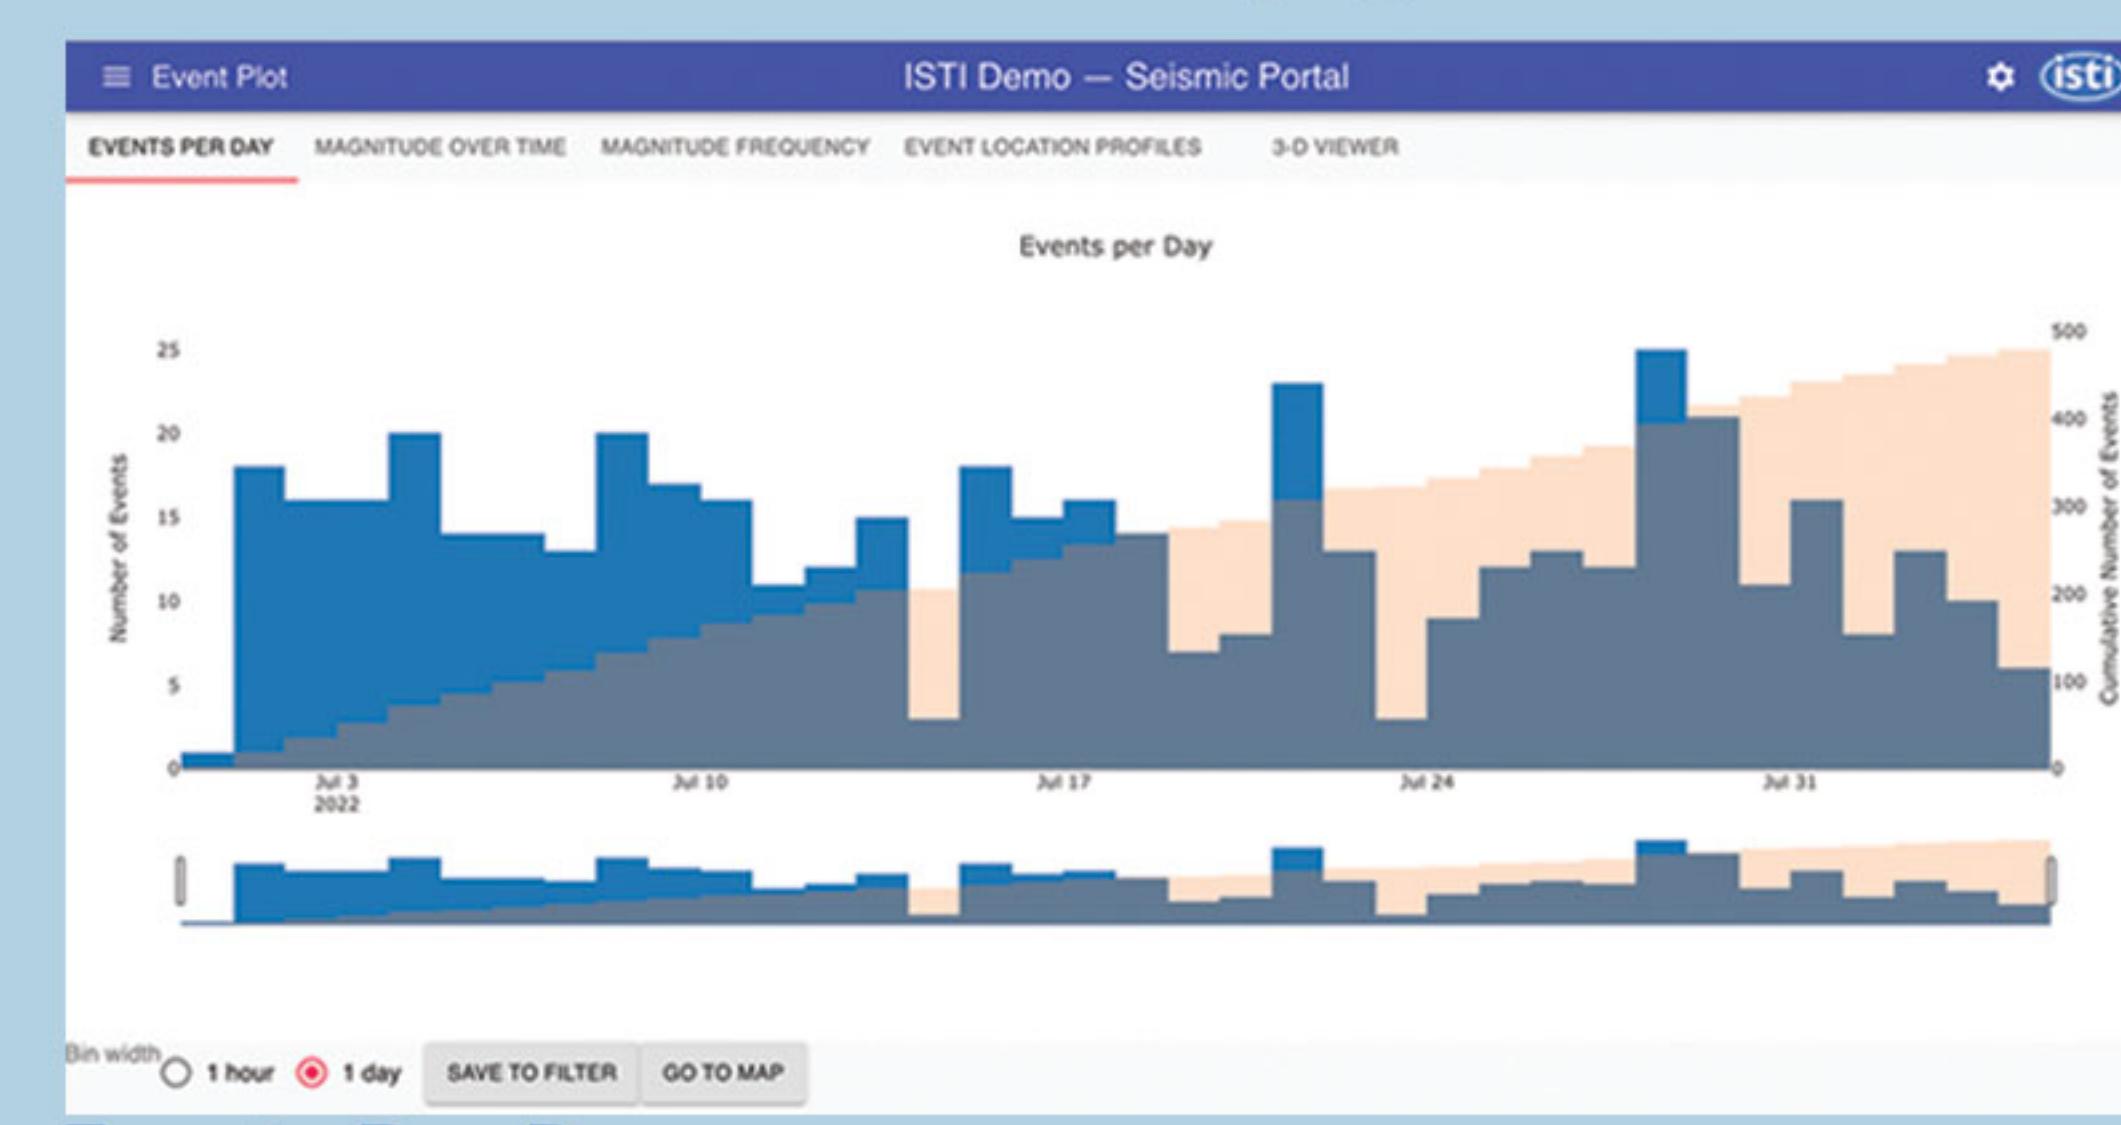

- Seismologists with significant operational experience in US basins
- Network design and velocity model creation
- PhD seismologists for study design and advanced data interpretation

ISTI installs seismic stations, including autonomous solar power, real-time wireless telemetry, digitizers and seismic sensors. Look to ISTI for a turn-key solution.
